RE: Chevron U.S.A. Inc. Decommissioning and Remediation of the Carpinteria Oil and Gas Processing Facilities Application Submittal

Dear Mr. Goggia:

Chevron U.S.A. Inc. (Chevron) is planning to decommission and remediate certain Oil and Gas Processing Facilities (Proposed Project) located in the City of Carpinteria (City). In support of this activity, Chevron has prepared the attached application for a Coastal Development Permit (CDP). To facilitate the City's review of the Proposed Project, Chevron is providing the following three-volume Proposed Project support package that includes:

- Volume I – Project Description
- Volume II – Technical Appendices
- Volume III – Preliminary Initial Study

Chevron's Project Description contains additional details regarding the Proposed Project to support Chevron's application for the CDP. Chevron's Preliminary Initial Study of its Proposed Project is being provided at the City's request and is intended to assist and not replace the City's independent review of potential environmental impacts of the Proposed Project under the California Environmental Quality Act (CEQA). The technical appendices have been written to complement both Chevron's Project Description and Preliminary Initial Study.

Chevron is pleased to submit the attached package, and appreciates the City's consideration of same. Please contact me if you have any questions or need any further information.

Sincerely,

A handwritten signature in blue ink that reads "Rebecca Trujillo".
